Interactive version, case studies & prices at timucin.site

HI, I'M ARDA ·

I build *products* & *games*, from MVP to live.

Product developer who ships MVPs fast and turns the ones that work into production systems, like nellkopya.com, a corporate e-commerce site taken from first commit to live. On the side I prototype game mechanics until they're fun. 4th-year Software Engineering student at Sakarya University with an Erasmus+ semester in Germany.

EXPERIENCE · XP LOG

Organizer · Google Developer Groups on Campus, Sakarya Univ. — Aug 2026 - now
Lead the campus chapter: event calendar, core team and workshops on Google technologies.

Project Developer · Huawei Student Developers Sakarya — Aug 2025 - Jul 2026
Mobile and cloud prototypes in the Huawei ecosystem, built in hackathons and workshops.

Campus Representative · Campus Arc — Oct 2025 - Mar 2026
Liaison between student communities and the brand; ran campus-wide events.

Backend Intern · Florawise (remote) — Aug - Sep 2025
Node.js backend services, database work and API integrations in an agile remote team.

Software Intern · Alnus Yatırım — Aug - Sep 2024
Normalized PostgreSQL schemas for real-time financial data; optimized reporting queries.

Software Intern · Meksa Yatırım — Jul - Aug 2024
Python stock-analysis prototype; turned analysts' strategies into scripts.

PROJECTS · QUESTS CLEARED

nellkopya.com — LIVE
Corporate e-commerce for a toner supplier: auth, inventory, cart and admin panel, from MVP to production.
Node.js · Express · React · PostgreSQL · Docker

Apoclimate — PLAYABLE
Climate-themed bunker management game set in 2071: balance energy, water, food, waste and carbon over 5 days.
Phaser · JavaScript

timucin.site — LIVE
Bilingual portfolio with an SVG motion layer, case studies and service pricing.
HTML · CSS · JS · Railway

Tower Defense — LEARNING
Engine-free desktop game: game loop, enemy waves, pathing and a tower-upgrade economy.
C# · .NET · WinForms

SERVICES · ITEM SHOP

Business website
Custom design, SEO basics, WhatsApp & maps
FROM 15.000 ₺

E-commerce
Products, stock, cart, orders & payments
FROM 40.000 ₺

MVP / web app
Core feature first, built to scale if it works
FROM 30.000 ₺

Game prototype
Playable core mechanic, weekly builds
FROM 20.000 ₺

EDUCATION · SAVE POINTS

Sakarya University · B.Sc. Software Engineering (4th year) — 2022 - now

Hochschule Aalen · Erasmus+ exchange, Software Engineering — Mar - Aug 2026
